

Accessing iBox

To open an iBox:

1. Press the Enter button to turn on your DisplayKEY.
2. On the OBTAIN KEY option press Enter.
3. Enter your PIN code and press Enter.
4. Aim the infrared (IR) port on the end of your DisplayKEY directly at the IR lens on the iBox.

After the tones stop your DisplayKEY prompts you to press up on the key container. Press up on the bottom of the iBox to release the key container.

Beaming Tips

- For best results, the distance between your Key and the iBox should be within 1 foot.
- In direct sunlight you may need to shade the area between the Key and iBox or place the Key right next to the iBox.

Wait for the tones to stop before breaking the connection between your Key and the iBox.
